

Volumes of Spheres

2 Volume of Spheres Suppose a sphere with radius r contains infinitely many pyramids with vertices at the center of the sphere. Each pyramid has height r and base area B . The sum of the volumes of all the pyramids equals the volume of the sphere.

$$\begin{aligned}
 V &= \frac{1}{3}B_1r_1 + \frac{1}{3}B_2r_2 + \dots + \frac{1}{3}B_n r_n && \text{Sum of volumes of pyramids} \\
 &= \frac{1}{3}r(B_1 + B_2 + \dots + B_n) && \text{Distributive Property} \\
 &= \frac{1}{3}r(4\pi r^2) && \text{The sum of the pyramid base areas equals the surface area of the sphere.} \\
 &= \frac{4}{3}\pi r^3 && \text{Simplify.}
 \end{aligned}$$

Key Concept Volume of a Sphere

Words The volume V of a sphere is $V = \frac{4}{3}\pi r^3$, where r is the radius of the sphere.

Symbols $V = \frac{4}{3}\pi r^3$

Example 3 Volumes of Spheres and Hemispheres

Find the volume of each sphere

Guided Practice

1A.

1B.

$$\begin{aligned}
 1A. \quad V &= \frac{4}{3}\pi r^3 \\
 &= \frac{4}{3} \cdot 3.14 \cdot 7.1^3 \\
 V &= 1498.45 \text{ mm}^3
 \end{aligned}$$

$$\begin{aligned}
 1B. \quad V &= \frac{4}{3}\pi r^3 \\
 &= \frac{4}{3} \cdot 3.14 \cdot 11^3 \\
 V &= 5572.45 \text{ ft}^3
 \end{aligned}$$
